

Troop 349

2012 Pioneering Camp out Westmoreland State Park Montross, VA

March 16-18, 2012

**Deadline for permission slip & payment:
Tues, Mar 13**

Westmoreland State Park lies within Westmoreland County, from which it takes its name. The park extends about one and a half miles along the Potomac River, and its 1,311 acres neighbor the former homes of both George Washington and Robert E. Lee. The park's Horsehead Cliffs provide visitors with a spectacular view of the Potomac River. In addition to the scenic beauty at Westmoreland, the park offers hiking, camping, cabins, fishing, boating and swimming. Visitors can enjoy the park's vacation cabins as well. The visitor center, open during summer, gives an informative historical and ecological perspective to an important natural area on the coastal plain. Westmoreland also offers the Murphy Hall Conference Center and the Potomac River Retreat, which is an upscale overnight accommodation.

Group Site: This site has no electric/water hookups and a maximum occupancy of 24. Water is available at the campground. The site is equipped with four 20 X 20' tent pads, a fire ring, a large grill and four tables. There is a laundry facility in Area A.

Pioneering Merit Badge

Requirements for the Pioneering merit badge:

1. Show that you know first aid for injuries or illness that could occur while working on pioneering projects, including minor cuts and abrasions, bruises, rope burns, blisters, splinters, sprains, heat and cold reactions, dehydration, and insect bites or stings.
2. Do the following:
 - a. Successfully complete Tenderfoot requirements 4a and 4b and First Class requirements 7a, 7b, and 7c. (These are the rope-related requirements.)
 - b. Tie the following: square knot, bowline, sheepshank, sheet bend, and round turn with two half hitches.
 - c. Demonstrate the following: tripod and round lashings.
3. Explain why it is useful to be able to throw a rope, then demonstrate how to coil and throw a 40-foot length of 1/4- or 3/8-inch rope. Explain how to improve your throwing distance by adding weight to the end of your rope.
4. Explain the differences between synthetic ropes and natural-fiber ropes. Discuss which types of rope are suitable for pioneering work and why. Include the following in your discussion: breaking strength, safe working loads, and the care and storage of rope.
5. Explain the uses for the back splice, eye splice, and short splice. Using 1/4- or 3/8-inch three-stranded rope, demonstrate how to form each splice.
6. Using a rope-making device or machine, make a rope at least 6 feet long consisting of three strands, each having three yarns.
7. Build a scale model of a signal tower or a monkey bridge. Correctly anchor the model using either the 1-1-1 anchoring system or the log and stake anchoring method. Describe the design of your project and explain how the anchoring system works.
8. Demonstrate the use of rope tackle to lift a weight of 25 pounds and pulling a log at least 6 inches in diameter and 6 feet long with the tackle. Use the tackle to put tension on a line. Explain the advantages and limitations of using a rope tackle. In your explanation, describe the potential damage that friction can do to a rope.
9. By yourself, build an A-trestle OR X-trestle OR H-trestle using square and diagonal lashings. Explain the application of the trestle you build. Demonstrate how to tie two spars together using a shear lashing.
10. With a group of Scouts, OR on your own, select a [pioneering project](#). With your counselor's guidance, create a rough sketch of the project. Make a list of the ropes and spars needed, then build the project. (Note: This requirement may be done at summer camp, at district or council events, or on a troop camp outing.)
